

c 1 1. ^{twice} (Amended) A computer-implemented method for managing a
2 dynamic Web page generation request to a Web server, said computer-
3 implemented method comprising the steps of:
4 routing said request from said Web server to a page server, said page
5 server receiving said request and releasing said Web server to process other
6 requests;
7 ^{ci} processing said request, said processing being performed by said page
8 server [concurrently with said Web server, as] while said Web server
9 concurrently processes said other requests; and
10 dynamically generating a Web page in response to said request, said
11 Web page including data dynamically retrieved from one or more data
12 sources.

c 1 11 ^{twice} 16. (Amended) [An article of manufacture comprising a computer
2 readable medium having computer instructions embodied therein for
3 causing a processor to manage a dynamic Web page generation request to a
4 Web server, said computer instructions in said article of manufacture causing
5 said processor] A machine readable medium having stored thereon data
6 representing sequences of instructions, which when executed by a computer
7 system, cause said computer system to perform the steps of:
8 routing [said] a dynamic Web page generation request from [said] a Web
9 server to a page server, said page server receiving said request and releasing
10 said Web server to process other requests;
11 ^{ci} processing said request, said processing being performed by said page
12 server while said Web server concurrently processes said other requests; and
13 dynamically generating a Web page, said Web page including data
14 retrieved from one or more data sources.
